Anton Shvets

Frontend developer (**Ready for relocation**)

Current location: Russia (Going to relocate)
telegram: @antonshvetc ••• antonshvetc@gmail.com
English: **B1:Intermediate**

About me:

- 2 years of experience in a team of 5+ developers (front / back)
- Full stack. Mostly frontend. React.js
- 1 year of work by SCRUM methodology
- Have experience in **creating application architecture**

What I am looking for:

- Company where I can grow as frontend developer
- Work with non-trivial, complex tasks.
- Opportunity to improve the development process, write auto-tests
- Introduce new, innovation solutions and make great products

My experience:

React.js developer

Profolio company
2021-2022 - https://github.com/profolio-team/customer-admin

App for managing companies portfolios. SaaS. B2B
Team: 5 devs and QA, UI/UX, BI, Designers, PM
Stack: Node.js, React.JS, Firebase, Styled Components, Firestore, Material UI

My duties:

- Implement new UI features
- Preparing tech plan for implementing
- Upgrade components, fix bugs
- Decompose big features to small tasks
- Code review

Result:

- New features: Table with users. Edit specific user. Pagination of table data.
- UI and functionality for Error pages
- Demo of implemented features, fixed bugs
- Hiring and involve new candidates

FullStack developer (JavaScript, PHP)
Online-store "santehnika-tut"
2020-2021

Team: 10 devs and QA, UI, BI, Designers, PM
Stack: PHP - Symphony, jQuery, SCSS, MySQL, Redis, Docker,

My duties:
- Development new functionality on PHP and JS
- Support website functionality: fix bugs
- SEO. Optimization for search engines

Result:
- System to analyze sales of items – to show popular items firstly, as result sale more items and earn more
- Upgrade UI to new design - more explicit and faster way of buy items
- Update styles to use BEM (Block, Element, Modifier)
- Speeded up development process by refactoring code (Reduced copy/paste, unused code, DRY, etc.)

Education

- 2015-2019 **Moscow Polytechnic University** - B.Sc. Industrial and Civil Engineering

- 2021 **- Frontend development**, Innopolis university
  https://github.com/Anton-Shvetc/React-MovieApp

My technical stack

- Firebase - *database, cloud functions*
- React, Redux, TypeScript, ES6
- NodeJs*, Express, MongoDB*
- BEM, LESS, SCSS
- Docker, PHP - Symphony
